

RISK FACTOR

You could lose ALL of your money investing in this product. This product is a High Risk Investment and is much riskier than a savings account. ISA eligibility does not guarantee returns or protect you from losses. Investors should be aware there are risks to investing in securities and corporate bonds of any company, especially if they are private companies not listed on a Recognised Investment Exchange, and there may be little or no opportunity to sell the securities easily should you need to do so. The value of your Investments can go down as well as up and therefore you may not recover some, or in extreme cases, any of the value of your initial investment.

The content of this promotion has not been approved by an authorised person within the meaning of the Financial Services and Markets Act 2000. Reliance on this promotion for the purpose of engaging in any investment activity may expose an individual to a significant risk of losing all of the property or other assets invested.

Investments offered on this platform are classed as speculative illiquid securities, which means that they may be difficult to sell and you may not get back the full amount invested.

Investments are not covered by the Financial Services Compensation Scheme (FSCS), your capital is at risk and returns are not guaranteed. Repayment of capital and interest or payment of dividends will be dependent on the success of the organisation's business model and past performance isn't a reliable indicator of future performance. You should always read the offer document in full before deciding whether or not to invest as it will cover risks specific to an individual investment. You can read more about general risks associated with making these types of investments here. If you are unsure if any of these investments are right for you, you should contact an Independent Finance Adviser.
